14th Transcranial Duplex-sonography Course

UNDER THE AUSPICES OF

world organisation of neurosonology

City of Hennigsdorf

Oberhavel Kliniken near Berlin

INVITATION

Prof. Dr. S.J. Schreiber
Prof. Dr. J.M. Valdueza

Greeting

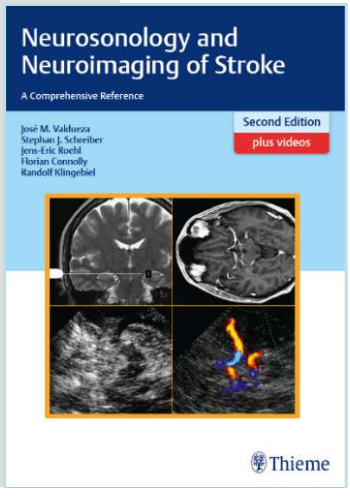

Dear colleagues,

We herewith announce our 14th international ultrasound course, taking place in the city of Hennigsdorf (near Berlin).
Diagnostic ultrasound of brain supplying vessels is gaining more and more importance. This is due to continuous advances in ultrasound systems and techniques which give us increasing insights into the sonographic vascular anatomy as well as cerebral hemodynamics. In this course we focus on intracranial vascular analysis of arteries and veins under physiological and pathological conditions. It aimes at colleagues, who would like to increase
their knowledge and practical skills in Neurosonology.
The course comprises theoretical lectures, extended tutored practicals with probands and patients as well as critical discussion in the context with other radiological modalities.
The hosts, both professor of Neurology at the Charité Universitätsmedizin Berlin, have a long-standing teaching experience, holding annual ultrasound courses in Berlin as well as in other European cities since 1999.
We cordially invite you to come to our course and combine it with a nice Berlin visit !
We are looking forward to seeing you in Hennigsdorf near Berlin !

José M. Valdueza Stephan J. Schreiber

Program Friday, 19.11.2027

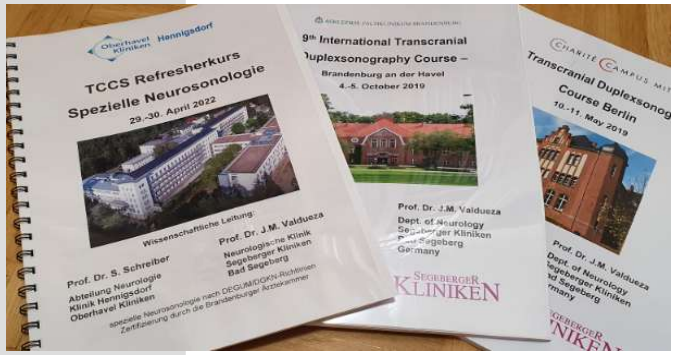

12.00-12.15	Welcome & Registration
12.15-13.00	Principles, tips & tricks
13.00-13.45	Transtemporal anatomy I
13.45-14.00	*Coffee break*
14.00-14.45	Transtemporal anatomiy II
14:45-15.30	Foraminale & Orbital anatomy
15.30-16.00	Anatomy of veins
16.00-16.30	*Coffee break*
16.30-18.30	Hands-on: Insonation of healthy probands
18.30-	Buffet

Teaching book with extended Information, case discussions and video material

Program Saturday, 20.11.2027

09.00-10.30	Stenoses
10.30-10.45	*Coffee break*
10.45-11.15	Occlusions
11.15-11.45	Collaterals
11.45-12.15	Acute stroke
12.25-13:25	*Lunch*
13.30-15.30	Hands-on: Insonation of patients with vascular pathology
15.45-17.00	Discussion of findings comparison of methods: ultrasound – MRA – CTA – DSA
17.00-17.15	Finish

Handout with all presentations
